After you place the Gold Star decal on your car's rear window, be sure to fill out the Gold Star travel card with all of the important information, insert the card in the plastic pouch and place the pouch in the glove compartment of your car.

If you are involved in a motor vehicle accident or your car becomes disabled, law enforcement and emergency response personnel will know by the Gold Star on your rear window that there is information about the driver's medical history, allergies, medications and physician available along with emergency contact information in the glove compartment.

Remember to update your Gold Star card if information changes.
